

Villa Caballeros Cork Underlayment Requirements

Any second or third floor unit replacing flooring is required to install a cork underlayment of 8 mm thickness in addition to any other underlayment that is required for carpets, ceramic or porcelain tile, wood or wood-like material in any room of the unit.

Owners must complete an architectural form (found on the website) and submit a signed copy to the management office prior to the installation of flooring or cork underlayment.

Proof of cork thickness must be attached to architectural form.

Installers must show proof of insurance, license, and bonds. This should be entered on architectural form.
